Collection of Best European Countertop Top Designs Seamless, Bookmatch & Fourmatch Capability

about **MARMONITE** ...

Marmonite stone is made of the main materials of corian and quartz, therefore it has both the properties of corian stone and quartz stone, one the other hand, due to the design and surface protrusion, it has a similar apperearance to natural stones.

Usage Of Marmonite

Marmonite is used like corian and quartz plates which are mainly used for cabinet tops, kitchen counters, table tops, all interior walls, and so on...

Marmonite is currently available in 11 designs and colors. it also has 3 surface finishes for the first time from very soft to super prominent.

Superior features of marmonite compared to other products

Marmonite, with a look very similar to the top brands of quartz in world is easily cut by the corian tool and does not have the hassle of installing quartz and ceramic plate and is also very suitable for classic work for stair tools.

Suitable surface hardness that no longer easily scratches and scratches like corinne plates.

Very high resistance to chemicals, which makes it possible to avoid discoloration and possible stains variety in colors and designs that cover all tastes.

It has soft and super prominent surface finishes that have the feeling of natural stone and in this respect is unique in its kind.

There is no difference between keeping dark and lights colors while keeping dark colors in corinne plates has many problems Supply of size 1 in 3 meters, which is very suitable for building an island.

The packing of each slab is very different, each product is made of durable foam and polymer cartons.

Very reasonable price compared to quartz and corian products available in the market

MARMONITE Resistance To Chemicals

Of chemicals and all household acidic 90% substances such as detergents, etc

Have no effect on marmonite and therefore it is one of the most resistant sheets produced for countertop
